

Heading

Insights & Resources (to replace Blog)

Subheading (we need to add up this section)

Explore expert insights, industry trends, practical guides, and innovative ideas to help your business grow and stay ahead.

Note: All the blogs that need to appear here are already provided in the folder on the email I sent during handover. Therefore, we need to find a way for me to edit them directly from the backend. This section will need to be updated almost every week to keep the content fresh, engage our clients, and give them something new to talk about. I must administer this.
